

CORPORATE SUPPORT

The 28th Annual Cardiovascular Interventions is supported, in part, by educational grants from industry, in accordance with the ACCME Accreditation Standards for Commercial Support. We gratefully acknowledge and thank the following contributors who have given generously to support this program via educational grants and/or an exhibit.

At Abbott, we're committed to helping you live your best possible life through the power of health. For more than 125 years, we've brought new products and technologies to the world—in nutrition, diagnostics, medical devices and branded generic pharmaceuticals—that create more possibilities for more people at all stages of life. Today, 74,000 of us are working to help people live not just longer, but better, in the more more than 150 countries we serve. Connect with us at www.abbott.com, on Facebook at www.facebook.com/Abbott and on Twitter @AbbottNews and @AbbottGlobal.

Abiomed (NASDAQ: ABMD) is a leading provider of medical devices that provide circulatory support. Our products are designed to enable the heart to rest by improving blood flow and/or performing the pumping of the heart. CEO, Chairman, and President Michael R. Minogue has focused the company's efforts on developing ground-breaking technologies designed to improve the patient outcomes focused on native heart recovery. Founded in 1981 for the purpose of developing the world's first artificial heart, Abiomed has remained dedicated to finding ways to bring the most advanced and beneficial technology to patients and physicians.

ACIST, a Bracco Group company, offers innovative technologies that simplify cardiovascular procedures and empower clinicians. The portfolio includes: CVi variable rate contrast injector, RXi the first and only "Rapid FFR" MicroCatheter system and HDi High Definition IVUS system.

Asahi Intecc is a medical device company focused on delivering clinically unique devices used in vascular procedures by interventional cardiologists, interventional radiologists, vascular surgeons and neurovascular surgeons. Asahi will leverage its four core competencies to develop device-based solutions targeting specific niches where Asahi can achieve a market leading position.

AstraZeneca

BARD | PERIPHERAL VASCULAR

Great ideas and great technologies can transform patient care. That's why at Bard Peripheral Vascular we offer a wide range of transformative medical devices for the peripheral vasculature including:

The LUTONIX® 035 Drug Coated Balloon PTA Catheter— is optimized to effectively treat lesions in the SFA, Full Popliteal, In-Stent Restenosis and Long Lesions with the ideal formulation and dosage designed for patient safety. Please consult package inserts for more detailed safety information and instructions for use.

Cardiovascular Systems, Inc. (CSI) is leading the way in the effort to successfully treat arterial calcium, a common complication for millions of patients suffering from peripheral and coronary artery diseases. CSI's mission is to develop and commercialize innovative solutions that help physicians save limbs and lives when facing this difficult-to-treat disease state. CSI is committed to clinical rigor, constant innovation and a defining drive to set the industry standard to deliver safe and effective medical devices that improve lives.

Chiesi USA, Inc., headquartered in Cary, NC, is a specialty pharmaceutical company focused on commercializing products for the hospital and adjacent specialty markets. Visit www.chiesiusa.com for more information.

Novartis Pharmaceuticals

Ostial Corporation is dedicated to providing a reliable solution to the challenges of aorto-ostial stenting.

FLASHTM Ostial System is designed to stabilize, post-dilate and conform the stent to the ostium during ostial post-stent dilation and angioplasty. The proprietary dual balloon design enables the physician to achieve maximal stent wall apposition after post-dilation and result in treating Ostial lesions. The FLASHTM is available for both coronary and peripheral indications.

PHILIPS

 **VOLCANO**

Philips Volcano, a Philips business, is a global leader in physiology and intravascular imaging for coronary and peripheral applications. The business also offers a suite of peripheral therapeutic devices. This is part of Philips' industry leading solutions to decide, guide and confirm the right therapy for each patient in real-time during image-guided therapies. Founded in cardiovascular care and expanding into other specialties, Philips is focused on improving patient and economic outcomes.
