Controversies & Advances

IN THE TREATMENT OF CARDIOVASCULAR DISEASE

PROGRAM DESCRIPTION

We look forward to the nineteenth annual Controversies and Advances in the Treatment of Cardiovascular Disease symposium! The two-day scientific program will offer realistic views on many controversial issues in cardiovascular disease today. Session topics will include atherosclerosis and dyslipidemia, digital medicine, coronary artery disease, cardiac imaging, structural heart disease, cardioembolic strokes, the right ventricle, electrophysiology, hypertension, acute PULM disease, new devices for heart failure, practice-changing trials of 2019, advanced heart failure, pathophysiology of endurance sports, and advanced technology in CVD management.

Sessions will include a combination of lectures, debates, and roundtable discussions. A faculty of internationally known leaders has been invited to share their knowledge and experiences with complex and controversial cases.

TARGET AUDIENCE

This symposium is designed for cardiologists, interventional cardiologists, cardiovascular and thoracic surgeons, perfusionists, nurses, technicians and those involved in the diagnosis, treatment and care of individuals with controversial and complex cases of cardiac disease.

LEARNING OBJECTIVES

Upon completion of this course, participants should be able to:

- :: Analyze the latest advancements and emerging treatments for atherosclerosis and dyslipidemia
- :: Examine and evaluate the future of digital medicine and healthcare delivery
- :: Discuss the new advanced technologies in cardiovascular disease management and how they will improve outcomes and quality of treatment and patient care
- :: Compare and contrast expert views on the treatment of complex coronary artery diseases
- :: Examine recent updates in cardiac imaging and discuss the roles and limitations for various imaging modalities
- :: Evaluate the current recommendations for effective management of syncope, and whether or not atrial fibrillation is curable
- :: Explain the current controversies in PULM disease
- :: Discuss dietary and pharmaceutical options for hypertension management
- :: Debate the pros and cons for alternatives to heart transplantation for advanced heart failure
- :: Understand and explain 2019's most important trials in cardiovascular disease and how they may affect changes in physician practices
- :: Identify the pathophysiology of endurance sports including extreme exercise and coronary calcium score and exercise optimization

FACULTY DISCLOSURE

In accordance with the ACCME Standards for Commercial Support, program directors, planning committees, faculty and all others in control of the educational content of the CME activity must disclose all relevant financial relationships with any commercial interest that they or their spouse/partner may have had within the past 12 months. If an individual refuses to disclose relevant financial relationships, they will be disqualified from being a part of the planning and implementation of this CME activity. Employees of a commercial interest with business lines or products relating to the content of the CME activity will not participate in the planning or any accredited portion of the conference. Disclosure will be made to all participants at the conference location, prior to the educational activity commencement.

CME ACCREDITATION AND DESIGNATION

Physicians: Promedica International is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians. Promedica International designates this live activity for a maximum of 16.75 *AMA PRA Category 1 Credit(s)*[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Nurses: Provider approved by the California Board of Registered Nursing, Provider #8495 for 16.75 Contact Hours.

Perfusionists: Category 1 CEUs for perfusionists will be determined by the American Board of Cardiovascular Perfusion and updated online at www.promedicacme.com.

Registered Cardiovascular Invasive Specialist: CCI does not approve CEUs directly, however CCI will accept CEUs that have already been approved by accredited sponsors of the Accreditation Council for Continuing Medical Education (ACCME). RCIS attendees will claim the physician certificate option when completing the online evaluation and can use that certificate to claim CEUs from CCI.

ABIM MOC ACCREDITATION

Successful completion of this CME activity, which includes participation in the evaluation component, enables the participant to earn up to 16.75 Medical Knowledge MOC points and Patient Safety MOC credits in the American Board of Internal Medicine's (ABIM) Maintenance of Certification (MOC) program. Participants will earn MOC points equivalent to the amount of CME credits claimed for the activity. It is the CME activity provider's responsibility to submit participant completion information to ACCME for the purpose of granting ABIM MOC credit.

COMMERCIAL SUPPORT

This program is supported in part by educational grants and exhibits from industry, in accordance with the ACCME Standards for Commercial Support. At the time of printing, a complete list of commercial supporters was not available. Appropriate acknowledgement will be given to all supporters in meeting materials onsite.

CULTURAL AND LINGUISTIC COMPETENCY

This activity is in compliance with California Assembly Bill 1195 which requires that all CME activities comprising a patient care element include curriculum addressing the topic of cultural and linguistic competency. The intent of this bill is to ensure that health care professionals are able to meet the cultural and linguistic concerns of a diverse patient population through effective and appropriate professional development. Cultural and linguistic competency was incorporated into the planning of this activity.

Mariposa Beverly Hills • Beverly Hills, California

WHAT THEY'RE SAYING:

- :: Overall, this is one of the best cardiovascular disease conferences I have ever attended for its depth, breadth, and clinical applicability.
- :: A unique and engaging symposium! The focus on controversy helps illuminate the material.
- :: Consistently great conference year after year!
- :: There were many great lectures and speakers at the conference. The research studies are fresh from the press!
- :: This symposium provides a fresh look at the critical controversies in cardiovascular disease, challenges our intellect, and adds therapeutic knowledge.
- :: I was impressed by the evidence-based practice as a result of incredible research all around the world!
- :: The program was outstanding and had practical applications for my daily practice.
